

Fuel Delivery & Emergency Assistance Platform

UI/UX Design System Documentation

1. Product Vision

Build a premium modern mobility platform focused on:

- Emergency fuel delivery
- Roadside assistance
- Women safety
- Real-time tracking
- AI-powered dispatch
- Fast logistics operations

The platform must feel:

- Safe
 - Fast
 - Trustworthy
 - Minimal
 - Premium
 - Emergency-focused
 - Logistics intelligent
-

2. Design Philosophy

Core UX Principles

Emergency First

Users may access the platform during stressful situations.

The interface must:

- reduce cognitive load
 - provide immediate actions
 - minimize decision complexity
 - prioritize speed
-

Trust Through Design

Trust indicators must be visible throughout the platform.

Examples:

- verified badges
 - live tracking
 - driver identity
 - delivery proof
 - PESO compliance badges
 - emergency support visibility
-

Speed Perception

The UI should visually communicate:

- real-time movement
- instant responsiveness
- active logistics
- ETA transparency

Use:

- live pulse indicators
 - animated tracking
 - dynamic ETA updates
 - loading skeletons
-

3. Brand Identity

Brand Personality

Attribute	Direction
Tone	Professional
Style	Premium Minimal
Feel	Safe & Reliable
Visual Identity	Logistics-Tech
Interaction Style	Fast & Smooth

Attribute	Direction
Emotional Direction	Calm During Emergency

4. Color System

Primary Palette

Primary Red

#D0021B

Used for:

- emergency CTAs
- primary actions
- active indicators
- alerts

Dark Base

#1A1A1A

Used for:

- navbar
- dashboard
- premium sections
- typography emphasis

Light Surface

#F5F5F5

Used for:

- backgrounds
- cards
- clean spacing areas

Neutral Gray

#666666

Used for:

- secondary text
- inactive states
- supporting UI

Semantic Colors

Success

#10B981

Warning

#F59E0B

Error

#EF4444

5. Typography System

Primary Font

- Inter

Secondary Font

- Satoshi

Optional Technical Label Font

- JetBrains Mono

Typography Hierarchy

Type	Size	Weight
Hero	64px	Bold
H1	48px	Bold
H2	36px	SemiBold
H3	28px	SemiBold
Body Large	18px	Regular
Body	16px	Regular
Small	14px	Medium
Label	12px	Medium

6. Spacing System

Use 8px spacing scale.

4
8
12
16
24
32
40
48
64
80
96

7. Border Radius

Component	Radius
Buttons	14px
Cards	20px

Component	Radius
Inputs	16px
Modals	24px

8. Shadows

Soft Card Shadow

```
box-shadow: 0px 10px 30px rgba(0,0,0,0.08);
```

Floating Dashboard Shadow

```
box-shadow: 0px 20px 60px rgba(0,0,0,0.12);
```

9. Layout System

Desktop Container

```
1440px
```

Grid

```
12-column grid
```

Mobile Width

```
390px
```

10. Core Website Sections

Landing Page

Sections

1. Hero
 2. Trust Indicators
 3. Services
 4. Live Tracking Preview
 5. Women Safety
 6. App Screens
 7. Fleet & Business
 8. Testimonials
 9. FAQ
 10. Footer
-

11. Mobile App Screens

Priority Screens

Customer App

- Home
- Emergency Fuel
- Live Tracking
- Roadside Assistance
- Payment
- Safety Mode
- Profile

Driver App

- Job Requests
- Navigation
- OTP Verification
- Delivery Proof
- Earnings

Admin Dashboard

- Live Orders
- Tracking Map
- Dispatch Center

- SOS Monitoring
 - Analytics
 - Revenue
-

12. Component Library

Buttons

Primary Button

- red background
- white text
- medium shadow

Secondary Button

- outlined dark border

Emergency Button

- solid red
 - glowing pulse animation
-

Cards

Service Card

Used for:

- towing
 - battery
 - fuel
 - puncture
-

ETA Card

Contains:

- ETA
- driver
- distance
- live status

Tracking Card

Contains:

- route
- status
- progress
- live movement

13. Navigation System

Desktop

- clean top navigation
- sticky navbar
- minimal links

Mobile

- bottom tab navigation
- thumb-friendly interaction
- floating emergency button

14. Motion Design

Animation Style

- subtle
- smooth
- premium
- functional

Avoid:

- excessive motion
 - distracting effects
-

Microinteractions

Include

- hover elevation
 - button feedback
 - pulse indicators
 - map transitions
 - loading skeletons
 - animated ETA
-

15. UX Guidelines

Cognitive Simplicity

Users may be:

- stressed
- stranded
- driving
- distracted

Reduce:

- unnecessary text
 - multiple decisions
 - complex flows
-

One-Tap Emergency

Emergency ordering flow must complete within:

30 seconds

16. Accessibility

Requirements

- WCAG compliant

- high contrast
 - large tap targets
 - readable typography
 - color-safe indicators
-

17. Dashboard Style

Visual Direction

- enterprise SaaS
- logistics control center
- real-time monitoring

Inspired by:

- Linear
 - Stripe
 - Uber Ops
 - Vercel
-

18. Design Inspirations

Product Inspiration

- Uber
 - Blinkit
 - Zepto
 - Tesla
 - Google Maps
 - Linear
 - Notion
-

19. Recommended Tech Stack

UI Framework

- Next.js
- Tailwind CSS
- shadcn/ui

Animation

- Framer Motion
- GSAP

Maps

- Mapbox
- Google Maps

Icons

- Lucide Icons
-

20. Final Design Goal

The final product should feel like:

“A premium emergency mobility operating system.”

Not just:

- fuel delivery app
- logistics platform

But:

- trusted emergency infrastructure
- modern urban mobility layer
- safety-first experience
- investor-ready technology product
